Natal Chart Report

What follows is your personal natal chart information and interpretations of the positions and aspects in your chart. This report reveals the positions of the planets in your natal chart by sign, focusing on the Sun sign, Moon sign, Mercury sign, Venus sign, and Mars sign. Most people are familiar with their Sun sign, but if your birth time is known, you can also discover your Ascendant or rising sign, as well as the positions of the planets in the houses of your chart. Aspects between the planets are listed and interpreted.

If your birth time is unknown, there may be uncertainty about your Moon sign because the Moon changes signs approximately every 2-1/2 days. This means you could be born on a day when the Moon sign changes. It's less likely but still possible for other planets and luminaries to change signs, depending on the planet (for example, the Sun changes signs approximately every 30 days). In cases of unknown birth time, the Moon might be in one of two possible signs. The possible range for Moon signs can be determined by noting the sign at 00:01 and at 23:59.

The tables below show the technical details of your natal chart, personalised based on your birth data. Following the tables is your free birth chart report.
